

NSU Wireless Internet Setup (iPhone 2.0 or higher)

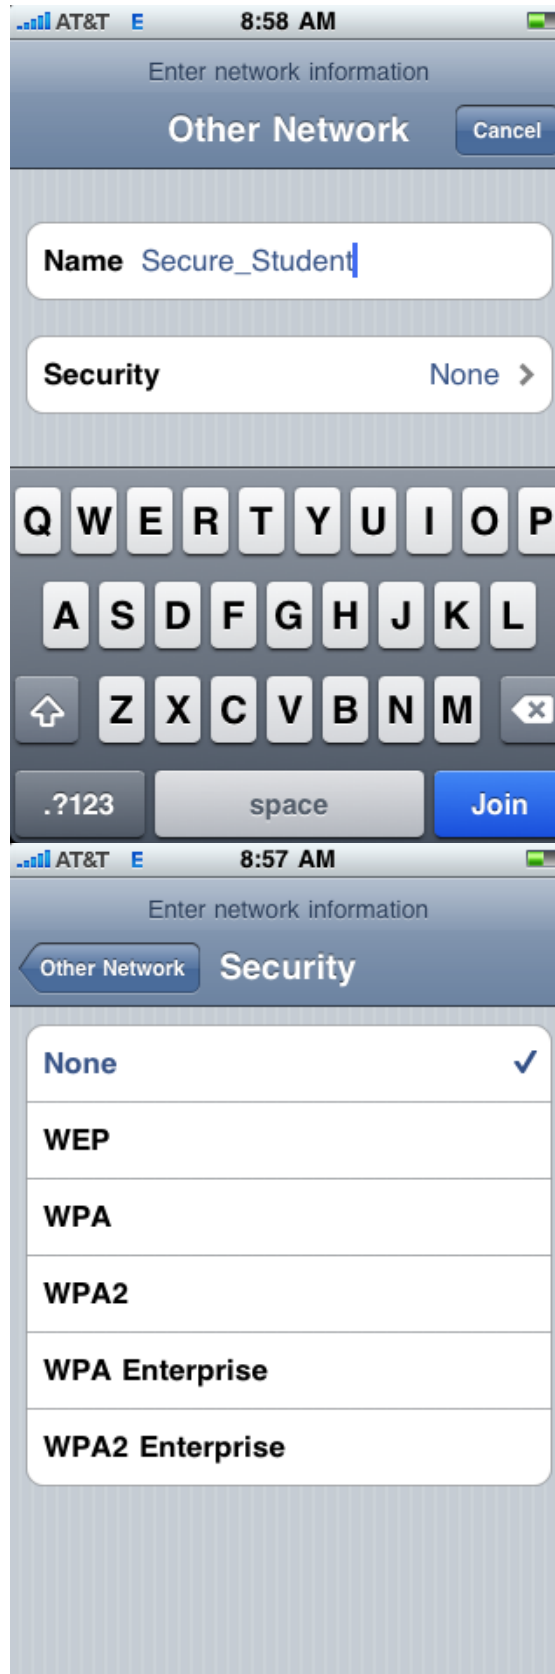

Your wireless network card must be able to support WPA (Wi-Fi Protected Access) security to connect to the NSU network. Any iPhone with software update 2.0 or higher is compatible.

Step #1: Tap the **Settings** icon on the Home screen. Tap on **Wi-Fi** under the Settings screen.

Step #2: Tap **Other** on the Wi-Fi Networks screen.

Step #3: Type in **Secure_Student** for the network Name, and tap the **Security** option.

Step #4: Tap **WPA2 Enterprise** to choose the correct security settings. Tap **Other Network** to return to the previous screen.

Step #5: Type in your myNSU username and password in the spaces provided and tap **Join**.

Step #6: The Wi-Fi Networks section will now have Secure_Student in the list with a check mark next to it..
