

# NSU Wireless Internet Setup

## (Mac OS X 10.5 Leopard or Mac OS X 10.6 Snow Leopard)

Your wireless network card must be able to support WPA (Wi-Fi Protected Access) security to connect to the NSU network. Any Apple Airport wireless card purchased with your Macintosh system is compatible.

**Step #1:** Click the wireless icon at the top right near the time. Click on **Join Other Network...** option in the list.

**Step #2:** For **Network Name:**, type either "Secure\_Student" or "Secure\_Student2".

For **Security:**, choose either **WPA2 Enterprise** or **WPA Enterprise**.

Type in your **User Name:** and **Password:** in the spaces provided.

Click **Join**.

**Step #3:** The **Verify Certificate** window will appear. Click **Continue** to connect to the NSU wireless network.
